

Mouse Seprase, FAP ELISA Kit | FAP elisa kit

Mouse Seprase, FAP ELISA Kit

CATALOG #
AAA123439

REACTIVITY
Mouse

PRODUCT SYNONYMS

Seprase; FAP; Mouse Seprase; FAP ELISA Kit; FAP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Sequence Length	252
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	3-900ng/mL
Sensitivity	1.66ng/mL
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for FAP elisa kit	Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse FAP antibody. FAP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse FAP Antibody is added and binds to FAP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated FAP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse FAP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm. Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse Seprase (also known as FAP) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	291555046
NCBI Official Full Name	Seprase

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
