ADDITIONAL INFORMATION

Related Product Information for CRY2 elisa kit

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human CRY2 antibody. CRY2 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human CRY2 Antibody is added and binds to CRY2 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated CRY2 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human CRY2. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Cryptochrome-2 (also known as CRY2) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.
