

Human Laminin-5, LN-5 ELISA Kit | LN-5 elisa kit

Human Laminin-5, LN-5 ELISA Kit

CATALOG #
AAA123576

REACTIVITY
Human

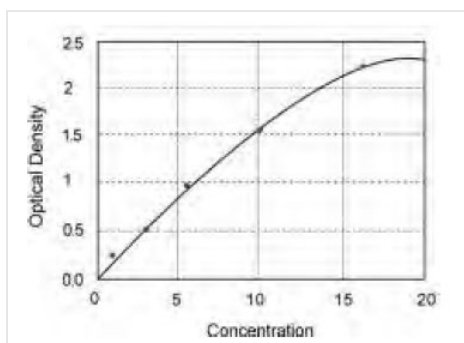

PRODUCT SYNONYMS

Laminin-5; LN-5; Human Laminin-5; LN-5 ELISA Kit; LN-5 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	3695
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	7-1500ng/ml
Sensitivity	3.19ng/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for LN-5 elisa kit	Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human LN-5 antibody. LN-5 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human LN-5 Antibody is added and binds to LN-5 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated LN-5 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human LN-5. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm. Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Laminin-5 (also known as LN-5) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	21886489
NCBI Official Full Name	laminin 5

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
