ADDITIONAL INFORMATION

Related Product Information for MXRA8 elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Matrix-remodeling-associated protein 8 (also known as MXRA8) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human MXRA8 antibody. MXRA8 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human MXRA8 Antibody is added and binds to MXRA8 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated MXRA8 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human MXRA8. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
