

## Human Ski oncogene, SKI ELISA Kit | SKI elisa kit

Human Ski oncogene, SKI ELISA Kit

CATALOG #  
**AAA123674**

REACTIVITY  
**Human**

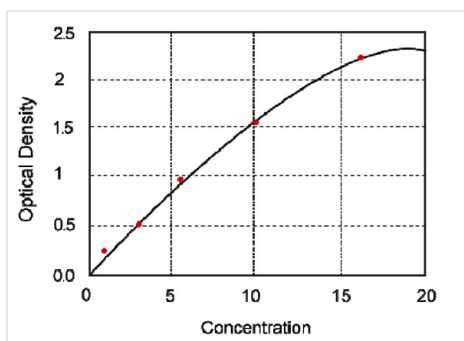

### PRODUCT SYNONYMS

Ski oncogene; SKI; Human Ski oncogene; SKI ELISA Kit; SKI elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                            |
| Sequence Length         | 730                                                                                                                                                                                              |
| Assay Type              | Quantitative Sandwich                                                                                                                                                                            |
| Samples                 | Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids                                                                                                   |
| Detection Range         | 20-4500ng/L                                                                                                                                                                                      |
| Sensitivity             | 10.02ng/L                                                                                                                                                                                        |
| Intra-assay Precision   | Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%                              |
| Inter-assay Precision   | Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10% |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                                                                                                                                           |

| Related Product Information for SKI elisa kit | <p>Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human SKI antibody. SKI present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human SKI Antibody is added and binds to SKI in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated SKI antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human SKI. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.</p> <p>Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Ski oncogene (also known as SKI) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.</p> |

NCBI AND UNIPROT INFORMATION

|                           |                |
|---------------------------|----------------|
| NCBI GI #                 | 126352568      |
| NCBI GenBank Nucleotide # | NP_001075287.1 |
| UniProt Accession #       | Q9TUG2         |
| NCBI Official Full Name   | ski oncogene   |
| UniProt Protein Name      | Ski oncogene   |
| UniProt Gene Name         | SKI            |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
