

## Human SPARC, SPARC ELISA Kit | SPARC elisa kit

Human SPARC, SPARC ELISA Kit

CATALOG #  
**AAA123678**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

SPARC; Human SPARC; SPARC ELISA Kit; SPARC elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                            |
| Sequence Length         | 303                                                                                                                                                                                              |
| Assay Type              | Quantitative Sandwich                                                                                                                                                                            |
| Samples                 | Cysteine (also known as SPARC) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids                                                                 |
| Detection Range         | 20-7000ng/mL                                                                                                                                                                                     |
| Sensitivity             | 9.48ng/mL                                                                                                                                                                                        |
| Intra-assay Precision   | Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%                              |
| Inter-assay Precision   | Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10% |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                                                                                                                                           |

ADDITIONAL INFORMATION

|                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for SPARC elisa kit | <p>Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human SPARC antibody. SPARC present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human SPARC Antibody is added and binds to SPARC in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated SPARC antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human SPARC. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.</p> <p>Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Secreted protein acidic and rich in cysteine (also known as SPARC) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.</p> |
