

Human Tuftelin, TUFT1 ELISA Kit | TUFT1 elisa kit

Human Tuftelin, TUFT1 ELISA Kit

CATALOG #
AAA123705

REACTIVITY
Human

PRODUCT SYNONYMS

Tuftelin; TUFT1; Human Tuftelin; TUFT1 ELISA Kit; TUFT1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	365
Samples	Serum, plasma, cell culture supernates, ascites, tissue homogenates or other biological fluids
Assay Type	Quantitative Sandwich
Detection Range	0.05-20ng/mL
Sensitivity	0.019ng/mL
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for TUFT1 elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Tuftelin (also known as TUFT1) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human TUFT1 antibody. TUFT1 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human TUFT1 Antibody is added and binds to TUFT1 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated TUFT1 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human TUFT1. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1343071463
NCBI GenBank Nucleotide #	NP_001347679.1
NCBI Official Full Name	tuftelin

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
