

Human Bone specific alkaline phosphatase, BAP ELISA Kit | BAP elisa kit

Human Bone specific alkaline phosphatase, BAP ELISA Kit

CATALOG #
AAA123825

REACTIVITY
Human

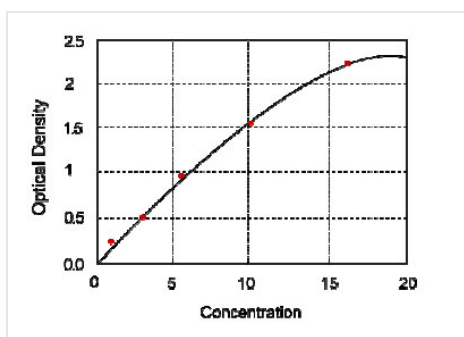

PRODUCT SYNONYMS

Bone specific alkaline phosphatase; BAP; Human Bone specific alkaline phosphatase; BAP ELISA Kit; BAP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	3-900U/L
Sensitivity	1.89U/L
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store the reagents at 2-8 degree C. For long term storage refer to the expiration date keep it at -20 degree C. Avoid repeated thaw cycles. If individual reagents are opened it is recommended that the kit be used within 1 month.

ADDITIONAL INFORMATION

Related Product Information for BAP elisa kit	Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human BAP antibody. BAP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human BAP Antibody is added and binds to BAP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated BAP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human BAP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm. Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Bone specific alkaline phosphatase (also known as BAP) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.
---	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
