

Bovine Heart Fatty Acid Binding Protein, H-FABP ELISA Kit | H-FABP elisa kit

Bovine Heart Fatty Acid Binding Protein, H-FABP ELISA Kit

CATALOG #
AAA123886

REACTIVITY
Bovine

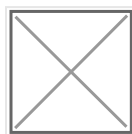

PRODUCT SYNONYMS

Heart Fatty Acid Binding Protein; H-FABP; Bovine Heart Fatty Acid Binding Protein; H-FABP ELISA Kit; H-FABP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	0.1-40ng/ml
Sensitivity	0.033ng/ml

ADDITIONAL INFORMATION

Related Product Information for H-FABP elisa kit

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Bovine H-FABP antibody. H-FABP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Bovine H-FABP Antibody is added and binds to H-FABP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated H-FABP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Bovine H-FABP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

Intended Uses: This sandwich kit is for the accurate quantitative detection of Bovine Heart Fatty Acid Binding Protein (also known as H-FABP) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
