

Mouse Cadherin-6 ELISA Kit | CDH6 elisa kit

Mouse Cadherin-6 PicoKine ELISA Kit

CATALOG #
AAA125303

REACTIVITY
Mouse

PRODUCT SYNONYMS

Cadherin-6; Mouse Cadherin-6 PicoKine ELISA Kit; Mouse Cadherin-6; cadherin 6; Kidney cadherin; K-cadherin; Cdh6; CDH6 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	Natural and recombinant Mouse Cdh6
Sequence Length	790
Samples	Cell culture supernates, serum and plasma (heparin, EDTA, citrate)
Detection Range	156pg/ml-10000pg/ml
Sensitivity	<50pg/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay): Three samples of known concentration were tested on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-Assay Precision (Precision across assays):Three samples of known concentration were tested in separate assays to assess inter-assay precision.
Preparation and Storage	Store at 4 degree C for 6 months. Store at -20 degree C for 12 months. Avoid multiple freeze-thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for CDH6 elisa kit	Principle of the Assay: The Picokine™ Mouse Cdh6 Pre-Coated ELISA (Enzyme-Linked Immunosorbent Assay) kit is a solid phase immunoassay specially designed to measure Mouse Cdh6 with a 96-well strip plate that is pre-coated with antibody specific for Cdh6. The detection antibody is a biotinylated antibody specific for Cdh6. The capture antibody is a monoclonal antibody from rat, the detection antibody is a biotinylated polyclonal antibody from goat. The kit contains recombinant Mouse Cdh6 with immunogen: Expression system for standard: NSO, Immunogen sequence: S54-A615. The kit is analytically validated with ready to use reagents. To measure Mouse Cdh6, add standards and samples to the wells, then add the biotinylated detection antibody. Wash the wells with PBS or TBS buffer, and add Avidin-Biotin-Peroxidase Complex (ABC-HRP). Wash away the unbounded ABC-HRP with PBS or TBS buffer and add TMB. TMB is substrate to HRP and will be catalyzed to produce a blue color product, which changes into yellow after adding acidic stop solution. The density of the yellow product is linearly proportional to Mouse Cdh6 in the sample. Read the density of the yellow product in each well using a plate reader, and benchmark the sample wells' readings against the standard curve to determine the concentration of Mouse Cdh6 in the sample.!!Background/Introduction: Cadherin-6 is a protein that in humans is encoded by the CDH6 gene. It is mapped to 15; 15 A1. This gene encodes a member of the cadherin superfamily. Cadherins are membrane glycoproteins that mediate homophilic cell-cell adhesion and play critical roles in cell differentiation and morphogenesis. The encoded protein is a type II cadherin and may play a role in kidney development as well as endometrium and placenta formation. Decreased expression of this gene may be associated with tumor growth and metastasis.
