

Rat Adiponectin ELISA Kit | ADIPOQ elisa kit

Rat Adiponectin PicoKine Fast ELISA Kit

CATALOG #
AAA125368

REACTIVITY
Rat

PRODUCT SYNONYMS

Adiponectin; Rat Adiponectin PicoKine Fast ELISA Kit; rat Adiponectin; adiponectin; C1Q and collagen domain containing; 30 kDa adipocyte complement-related protein; Protein Adipoq; Adipoq; Acdc; rCG_36676; ADIPOQ elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	Natural and recombinant Rat Adipoq
Sequence Length	244
Samples	Cell culture supernates, serum, plasma(heparin, EDTA)and urine
Detection Range	156pg/ml-10,000pg/ml
Sensitivity	<10pg/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay): Three samples of known concentration were tested on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-Assay Precision (Precision accross assays):Three samples of known concentration were tested in separate assays to assess inter-assay precision.
Preparation and Storage	Store at 4 degree C for 6 months. Store at -20 degree C for 12 months. Avoid multiple freeze-thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for ADIPOQ elisa kit	Principle of the Assay: The Boster Picokine™ Rat Adipoq Pre-Coated ELISA (Enzyme-Linked Immunosorbent Assay) kit is a solid phase immunoassay specially designed to measure Rat Adipoq with a 96-well strip plate that is pre-coated with antibody specific for Adipoq. The detection antibody is a biotinylated antibody specific for Adipoq. The capture antibody is monoclonal antibody from mouse, the detection antibody is polyclonal antibody from goat. The kit contains recombinant Rat Adipoq with immunogen: Expression system for standard: E.coli; Immunogen sequence: I19-N244. The kit is analytically validated with ready to use reagents. To measure Rat Adipoq, add standards and samples to the wells, then add the biotinylated detection antibody. Wash the wells with PBS or TBS buffer, and add Avidin-Biotin-Peroxidase Complex (ABC-HRP). Wash away the unbounded ABC-HRP with PBS or TBS buffer and add TMB. TMB is substrate to HRP and will be catalyzed to produce a blue color product, which changes into yellow after adding acidic stop solution. The density of the yellow product is linearly propotional to Rat Adipoq in the sample. Read the density of the yellow product in each well using a plate reader, and benchmark the sample wells' readings against the standard curve to determine the concentration of Rat Adipoq in the sample.!!Background/Introduction: Adiponectin(ADPN) is a hormone secreted by adipocytes that regulates energy homeostasis and glucose and lipid metabolism. Adiponectin is a new member of the family of soluble defense collagens, in hematopoiesis and immune responses. It is an important negative regulator in hematopoiesis and immune systems and raise the possibility that it may be involved in ending inflammatory responses through its inhibitory functions. Adiponectin is mapped to 3q27 and can protect the organism from systemic inflammation by promoting the clearance of early apoptotic cells by macrophages through a receptor-dependent pathway involving calreticulin.

NCBI AND UNIPROT INFORMATION

NCBI GI #	81901098
NCBI GeneID	246253
UniProt Accession #	Q8K3R4
NCBI Official Full Name	30 kDa adipocyte complement-related protein (Adiponectin, C1Q and collagen domain containing)
NCBI Official Synonym Full Names	adiponectin, C1Q and collagen domain containing
NCBI Official Symbol	Adipoq
NCBI Official Synonym Symbols	Acdc; Adid; Acrp30
NCBI Protein Information	adiponectin
UniProt Protein Name	30 kDa adipocyte complement-related protein
UniProt Gene Name	Adipoq
UniProt Entry Name	Q8K3R4_RAT

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
