

Rabbit anti-Mouse, Rat FHL Polyclonal Antibody | anti-Fhl1 antibody

Anti-FHL Antibody

CATALOG # AAA125422	HOST Rabbit	REACTIVITY Mouse, Rat	APPLICATIONS ELISA, Flow Cytometry, Functional Assay, Western Blot
-------------------------------	-----------------------	---------------------------------	--

PRODUCT SYNONYMS

FHL; Polyclonal Antibody; Anti-FHL Antibody; Four and a half LIM domains protein 1; FHL-1; KyoT; RBP-associated molecule 14-1; RAM14-1; Skeletal muscle LIM-protein 1; SLIM; SLIM-1; anti-Fhl1 antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Mouse, Rat
Clonality	Polyclonal
Isotype	IgG
Specificity	No cross reactivity with other proteins.
Purity/Purification	Immunogen affinity purified.
Form/Format	Lyophilized Each vial contains 4mg Trehalose, 0.9mg NaCl, 0.2mg Na ₂ HPO ₄ , 0.05mg NaN ₃ .
Sequence Length	296
Applicable Applications for anti-Fhl1 antibody	ELISA (Direct ELISA), FCM/FACS (Flow Cytometry), WB (Western Blot)
Immunogen	E Coli-derived mouse FHL1 recombinant protein (Position: M1-L280).
Reconstitution	Add 0.2ml of distilled water will yield a concentration of 500ug/ml.
Preparation and Storage	Store at -20 degree C for one year. After reconstitution, at 4 degree C for one month. It can also be aliquotted and stored frozen store at -20 degree C for a longer time. Avoid repeated freezing and thawing.

WB (Western Blot)

FCM/FACS (Flow Cytometry)

ADDITIONAL INFORMATION

Related Product Information for anti-Fhl1 antibody	Description: Rabbit IgG polyclonal antibody for FHL detection. Tested with WB, FCM, Direct ELISA in Mouse; Rat. Background: Four and a half LIM domains protein 1 is a protein that in humans is encoded by the FHL1 gene. It is mapped to Xq26.3. This gene encodes a member of the four-and-a-half-LIM-only protein family. Family members contain two highly conserved, tandemly arranged, zinc finger domains with four highly conserved cysteines binding a zinc atom in each zinc finger. Expression of these family members occurs in a cell- and tissue-specific mode and these proteins are involved in many cellular processes. Mutations in this gene have been found in patients with Emery-Dreifuss muscular dystrophy. Multiple alternately spliced transcript variants which encode different protein isoforms have been described.
