

# Rat Follicle Stimulating Hormone (FSH) ELISA Kit | FSH elisa kit

Rat Follicle Stimulating Hormone (FSH) ELISA Kit

|                              |                          |
|------------------------------|--------------------------|
| CATALOG #<br><b>AAA12650</b> | REACTIVITY<br><b>Rat</b> |
|------------------------------|--------------------------|

## PRODUCT SYNONYMS

Follicle Stimulating Hormone (FSH); Rat Follicle Stimulating Hormone (FSH) ELISA Kit; FSH elisa kit

## PRODUCT SPECIFICATIONS

|                         |                                               |
|-------------------------|-----------------------------------------------|
| Reactivity              | Rat                                           |
| Sequence Length         | 129                                           |
| Samples                 | Rat serum, plasma or cell culture supernatant |
| Assay Type              | Quantitative Sandwich                         |
| Detection Range         | 100 mIU/mL-1.56 mIU/mL                        |
| Sensitivity             | Up to 0.5 mIU/mL                              |
| Intra-assay Precision   | <= 8%                                         |
| Inter-assay Precision   | <= 12%                                        |
| Preparation and Storage | Store all reagents at 2-8 degree C.           |

## ADDITIONAL INFORMATION

|                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-----------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for FSH elisa kit | Principle of the Assay: As mentioned above, this kit utilizes the Double Antibody Sandwich ELISA technique. The pre-coated antibody is an anti-Rat FSH monoclonal antibody, while the detection antibody is a biotinylated polyclonal antibody. Samples and biotinylated antibodies are added into ELISA plate wells and washed out with PBS or TBS after their respective additions to the wells. Then Avidin-peroxidase conjugates are added to the wells in after. TMB substrate is used for coloration after the enzyme conjugate has already been thoroughly washed out of the wells by PBS or TBS. TMB reacts to form a blue product from the peroxidase activity, and finally turns to yellow after addition of the stop solution (Color Reagent C). The color intensity and quantity of target analyte in the sample are positively correlated. |
