

Human Ischemia modified albumin (IMA) ELISA Kit | IMA elisa kit

Human Ischemia modified albumin (IMA) ELISA Kit

CATALOG #
AAA12679

REACTIVITY
Human

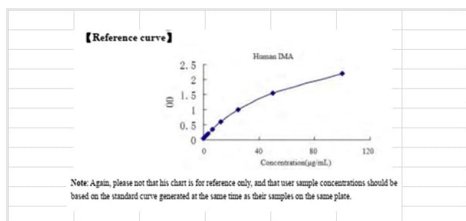

PRODUCT SYNONYMS

Ischemia modified albumin (IMA); Human Ischemia modified albumin (IMA) ELISA Kit; IMA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	No cross-reaction with other factors.
Sequence Length	520
Assay Type	Sandwich
Detection Range	100 ug/mL-1.56 ug/mL
Sensitivity	Up to 0.5 ug/mL
Intra-assay Precision	<= 8%
Inter-assay Precision	<= 12%
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for IMA elisa kit

Principle of the Assay: As mentioned above, this kit utilizes the Double Antibody Sandwich ELISA technique. The pre-coated antibody is an anti-Human IMA monoclonal antibody, while the detection antibody is a biotinylated polyclonal antibody. Samples and biotinylated antibodies are added into ELISA plate wells and washed out with PBS or TBS after their respective additions to the wells. Then Avidin-peroxidase conjugates are added to the wells in after. TMB substrate is used for coloration after the enzyme conjugate has already been thoroughly washed out of the wells by PBS or TBS. TMB reacts to form a blue product from the peroxidase activity, and finally turns to yellow after addition of the stop solution (Color Reagent C). The color intensity and quantity of target analyte in the sample are positively correlated.

NCBI AND UNIPROT INFORMATION

NCBI GI #	618041012
Molecular Weight	57,163 Da

NCBI Official Full Name	Importin subunit alpha
UniProt Protein Name	Importin subunit alpha
UniProt Gene Name	IMA
UniProt Entry Name	A0A034W812_BACDO

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
