

Human RNA Binding Motif Protein 3 (RBM3) ELISA Kit | RBM3 elisa kit

Human RNA Binding Motif Protein 3 (RBM3) ELISA Kit

CATALOG #
AAA129562

REACTIVITY
Human

PRODUCT SYNONYMS

RNA Binding Motif Protein 3 (RBM3); Human RNA Binding Motif Protein 3 (RBM3) ELISA Kit; IS1-RNPL; RNPL; Putative RNA-binding protein 3; RBM3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of RNA Binding Motif Protein 3 (RBM3). No significant cross-reactivity or interference between RNA Binding Motif Protein 3 (RBM3) and analogues was observed.
Sequence Length	70
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.055ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level RNA Binding Motif Protein 3 (RBM3) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level RNA Binding Motif Protein 3 (RBM3) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for RBM3 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to RNA Binding Motif Protein 3 (RBM3). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to RNA Binding Motif Protein 3 (RBM3). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain RNA Binding Motif Protein 3 (RBM3), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of RNA Binding Motif Protein 3 (RBM3) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for RBM3 elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	355715666
Molecular Weight	7,757 Da
NCBI Official Full Name	RNA binding motif protein 3, partial
UniProt Protein Name	RNA binding motif protein 3
UniProt Entry Name	G9KKH0_MUSPF

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
