

Human Iron Responsive Element Binding Protein 2 (IREB2) ELISA Kit | IREB2 elisa kit

Human Iron Responsive Element Binding Protein 2 (IREB2) ELISA Kit

CATALOG #
AAA129707

REACTIVITY
Human

PRODUCT SYNONYMS

Iron Responsive Element Binding Protein 2 (IREB2); Human Iron Responsive Element Binding Protein 2 (IREB2) ELISA Kit; IRP2; Iron regulatory protein 2; IREB2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Iron Responsive Element Binding Protein 2 (IREB2). No significant cross-reactivity or interference between Iron Responsive Element Binding Protein 2 (IREB2) and analogues was observed.
Sequence Length	963
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.055ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Iron Responsive Element Binding Protein 2 (IREB2) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Iron Responsive Element Binding Protein 2 (IREB2) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for IREB2 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Iron Responsive Element Binding Protein 2 (IREB2). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Iron Responsive Element Binding Protein 2 (IREB2). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Iron Responsive Element Binding Protein 2 (IREB2), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Iron Responsive Element Binding Protein 2 (IREB2) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for IREB2 elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	41352693
NCBI GeneID	3658
NCBI Accession #	NP_004127.1
NCBI GenBank Nucleotide #	NM_004136.2
UniProt Accession #	P48200; Q13095; Q1HE21; Q59FQ7; Q8WVK6; Q9UF17; A8KAC7; E1CJT9; HOYKU0
Molecular Weight	37,487 Da
NCBI Official Full Name	iron-responsive element-binding protein 2
NCBI Official Synonym Full Names	iron-responsive element binding protein 2
NCBI Official Symbol	IREB2
NCBI Official Synonym Symbols	ACO3; IRP2; IRP2AD
NCBI Protein Information	iron-responsive element-binding protein 2
UniProt Protein Name	Iron-responsive element-binding protein 2
UniProt Gene Name	IREB2
UniProt Synonym Gene Names	IRE-BP 2; IRP2
UniProt Entry Name	IREB2_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
