

Human Estrogen Receptor Beta (ERb) CLIA Kit | ERb clia kit

Human Estrogen Receptor Beta (ERb) CLIA Kit

CATALOG #
AAA129787

REACTIVITY
Human

PRODUCT SYNONYMS

Estrogen Receptor Beta (ERb); Human Estrogen Receptor Beta (ERb) CLIA Kit; ER-B; ESRB; ESTRB; NR3A2; NR3-A2; ESR2; Estrogen Receptor 2; Nuclear Receptor Subfamily 3; Group A; Member 2; ERb clia kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Estrogen Receptor Beta (ERb). No significant cross-reactivity or interference between Estrogen Receptor Beta (ERb) and analogues was observed.
Sequence Length	567
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	27.4-20,000pg/mL
Sensitivity	9.7pg/mL
Application	Chemiluminescent immunoassay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Estrogen Receptor Beta (ERb) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Estrogen Receptor Beta (ERb) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for ERb clia kit	The microplate provided in this kit has been pre-coated with an antibody specific to Estrogen Receptor Beta (ERb). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Estrogen Receptor Beta (ERb). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Estrogen Receptor Beta (ERb) level in the sample or standard.;
Product Categories/Family for ERb clia kit	Endocrinology; Reproductive science; Hormone metabolism

NCBI AND UNIPROT INFORMATION

NCBI GI #	46877096
NCBI GeneID	13983
NCBI Accession #	NP_997590.1
NCBI GenBank Nucleotide #	NM_207707.1
UniProt Accession #	O08537; O35635; O70519; Q8BG65; Q91Z86; B2RUC6; E9QKX7
Molecular Weight	42,107 Da
NCBI Official Full Name	estrogen receptor beta isoform 1
NCBI Official Synonym Full Names	estrogen receptor 2 (beta)
NCBI Official Symbol	Esr2
NCBI Official Synonym Symbols	ER[b]; Estrb; ERbeta
NCBI Protein Information	estrogen receptor beta
UniProt Protein Name	Estrogen receptor beta
UniProt Gene Name	Esr2
UniProt Synonym Gene Names	Estrb; Nr3a2; ER-beta
UniProt Entry Name	ESR2_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
