

## Human Zymogen Granule Protein 16 Homolog B (ZG16B) CLIA Kit | ZG16B clia kit

Human Zymogen Granule Protein 16 Homolog B (ZG16B) CLIA Kit

CATALOG #  
**AAA130027**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Zymogen Granule Protein 16 Homolog B (ZG16B); Human Zymogen Granule Protein 16 Homolog B (ZG16B) CLIA Kit; JCLN2; Jacalin-Like Lectin Domain Containing 2; ZG16B clia kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for ZG16B clia kit | The microplate provided in this kit has been pre-coated with an antibody specific to Zymogen Granule Protein 16 Homolog B (ZG16B). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Zymogen Granule Protein 16 Homolog B (ZG16B). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Zymogen Granule Protein 16 Homolog B (ZG16B) level in the sample or standard.; |
| Product Categories/Family for ZG16B clia kit   | Signal Transduction                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
