

## Mouse Interleukin 33 (IL33) CLIA Kit | IL33 clia kit

Mouse Interleukin 33 (IL33) CLIA Kit

CATALOG #  
**AAA130100**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

Interleukin 33 (IL33); Mouse Interleukin 33 (IL33) CLIA Kit; DV27; C9ORF26; IL1F11; NFHEV; Interleukin-1 Family; Member 11; Nuclear factor from high endothelial venules; IL33 clia kit

| Reactivity                                        | Mouse                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Interleukin 33 (IL33). No significant cross-reactivity or interference between Interleukin 33 (IL33) and analogues was observed.                                                                                                                                                                                                                                                                                |
| Sequence Length                                   | 144                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Assay Type                                        | Double-antibody Sandwich                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Samples                                           | Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids                                                                                                                                                                                                                                                                                                                                                                                       |

| Sensitivity                                       | 0.51pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Application                                       | Chemiluminescent immunoassay for Antigen Detection.                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Intra-assay Precision (Precision within an assay) | 3 samples with low, middle and high level Interleukin 33 (IL33) were tested 20 times on one plate, respectively.                                                                                                                                                                                                                                                                                                                                                                           |
| Inter-assay Precision (Precision between assays)  | 3 samples with low, middle and high level Interleukin 33 (IL33) were tested on 3 different plates, 8 replicates in each plate.                                                                                                                                                                                                                                                                                                                                                             |
| CV(%) =                                           | SD/meanX100                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for IL33 clia kit | The microplate provided in this kit has been pre-coated with an antibody specific to Interleukin 33 (IL33). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Interleukin 33 (IL33). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Interleukin 33 (IL33) level in the sample or standard.; |
| Product Categories/Family for IL33 clia kit   | Cytokine; Infection immunity                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
