

Human Allograft Inflammatory Factor 1 (AIF1) CLIA Kit | AIF1 clia kit

Human Allograft Inflammatory Factor 1 (AIF1) CLIA Kit

CATALOG #
AAA130199

REACTIVITY
Human

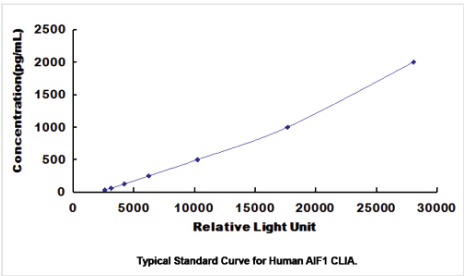

PRODUCT SYNONYMS

Allograft Inflammatory Factor 1 (AIF1); Human Allograft Inflammatory Factor 1 (AIF1) CLIA Kit; IBA1; IRT1; Daintain; Protein G1; Ionized calcium-binding adapter molecule 1; AIF1 clia kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Allograft Inflammatory Factor 1 (AIF1). No significant cross-reactivity or interference between Allograft Inflammatory Factor 1 (AIF1) and analogues was observed.
Sequence Length	147
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	2.74-2,000pg/mL
Sensitivity	1.08pg/mL
Application	Chemiluminescent immunoassay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Allograft Inflammatory Factor 1 (AIF1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Allograft Inflammatory Factor 1 (AIF1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for AIF1 clia kit	The microplate provided in this kit has been pre-coated with an antibody specific to Allograft Inflammatory Factor 1 (AIF1). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Allograft Inflammatory Factor 1 (AIF1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Allograft Inflammatory Factor 1 (AIF1) level in the sample or standard.;
Product Categories/Family for AIF1 clia kit	Cytokine; Infection immunity; Immune molecule

NCBI AND UNIPROT INFORMATION

NCBI GI #	9506379
NCBI GeneID	11629
NCBI Accession #	NP_062340.1
NCBI GenBank Nucleotide #	NM_019467.2
UniProt Accession #	O70200
Molecular Weight	16,911 Da
NCBI Official Full Name	allograft inflammatory factor 1
NCBI Official Synonym Full Names	allograft inflammatory factor 1
NCBI Official Symbol	Aif1
NCBI Official Synonym Symbols	G1; Iba1; AIF-1; AI607846; D17H6S50E
NCBI Protein Information	allograft inflammatory factor 1
UniProt Protein Name	Allograft inflammatory factor 1
UniProt Gene Name	Aif1
UniProt Synonym Gene Names	Iba1; AIF-1
UniProt Entry Name	AIF1_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
