| Reactivity                                        | Mouse                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Thrombospondin 1 (THBS1). No significant cross-reactivity or interference between Thrombospondin 1 (THBS1) and analogues was observed.                                                                                                                                                                                                                                                                          |
| Sequence Length                                   | 1170                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Assay Type                                        | Double-antibody Sandwich                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Detection Range                                   | 5.49-4,000pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Sensitivity                                       | 1.99pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Application                                       | Chemiluminescent immunoassay for Antigen Detection.                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Intra-assay Precision (Precision within an assay) | 3 samples with low, middle and high level Thrombospondin 1 (THBS1) were tested 20 times on one plate, respectively.                                                                                                                                                                                                                                                                                                                                                                        |
| Inter-assay Precision (Precision between assays)  | 3 samples with low, middle and high level Thrombospondin 1 (THBS1) were tested on 3 different plates, 8 replicates in each plate.                                                                                                                                                                                                                                                                                                                                                          |
| CV(%) =                                           | SD/meanX100                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for THBS1 clia kit | The microplate provided in this kit has been pre-coated with an antibody specific to Thrombospondin 1 (THBS1). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Thrombospondin 1 (THBS1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Thrombospondin 1 (THBS1) level in the sample or standard.; |
| Product Categories/Family for THBS1 clia kit   | Infection immunity; Hematology                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
