

Human Growth Differentiation Factor 1 (GDF1) CLIA Kit | GDF1 clia kit

Human Growth Differentiation Factor 1 (GDF1) CLIA Kit

CATALOG #
AAA130543

REACTIVITY
Human

PRODUCT SYNONYMS

Growth Differentiation Factor 1 (GDF1); Human Growth Differentiation Factor 1 (GDF1) CLIA Kit; Embryonic growth/differentiation factor 1; GDF1 clia kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Growth Differentiation Factor 1 (GDF1). No significant cross-reactivity or interference between Growth Differentiation Factor 1 (GDF1) and analogues was observed.
Sequence Length	361
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma and other biological fluids
Detection Range	2.74-2,000pg/mL
Sensitivity	1.16pg/mL
Application	Chemiluminescent immunoassay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Growth Differentiation Factor 1 (GDF1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Growth Differentiation Factor 1 (GDF1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for GDF1 clia kit	The microplate provided in this kit has been pre-coated with an antibody specific to Growth Differentiation Factor 1 (GDF1). Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to Growth Differentiation Factor 1 (GDF1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then the mixture of substrate A and B is added to generate glow light emission kinetics. Upon plate development, the intensity of the emitted light is proportional to the Growth Differentiation Factor 1 (GDF1) level in the sample or standard.;
Product Categories/Family for GDF1 clia kit	Cytokine; Neuroscience; Developmental science; Genetic science

NCBI AND UNIPROT INFORMATION

NCBI GI #	62857459
NCBI GeneID	549573
NCBI Accession #	NP_001016819.1
NCBI GenBank Nucleotide #	NM_001016819.2
NCBI Official Full Name	embryonic growth/differentiation factor 1
NCBI Official Synonym Full Names	growth differentiation factor 1
NCBI Official Symbol	gdf1
NCBI Official Synonym Symbols	vg1; dvr1; gdf3; vg-1; dvr-1; gdf-1
NCBI Protein Information	embryonic growth/differentiation factor 1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
