Preparation and Storage	Storage: Avoid repeated freeze/thaw cycles. Store at 4 C for frequent use. Aliquot and store at -20 C for 12 months. Stability Test: The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37 C for 48h, and no obvious degradation and precipitation were observed.The loss rate is less than 5% within the expiration date under appropriate storage condition.

WB (Western Blot)
Figure. Western Blot; Sample: Recombinant protein.
