

## Rabbit anti-Human Collectin Liver 1 (CLL1) Antibody | anti-CLL1 antibody

Polyclonal Antibody to Collectin Liver 1 (CLL1)

| CATALOG # | HOST   | REACTIVITY | APPLICATIONS                       |
|-----------|--------|------------|------------------------------------|
| AAA132188 | Rabbit | Human      | Immunohistochemistry, Western Blot |

### PRODUCT SYNONYMS

Collectin Liver 1 (CLL1); Polyclonal Antibody to Collectin Liver 1 (CLL1); anti-CLL1 antibody

### PRODUCT SPECIFICATIONS

|                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Immunogen                                      | Recombinant CLL1 (Pro34-Lys277) expressed in E.coli .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Preparation and Storage                        | <p><b>Storage:</b><br/>           Avoid repeated freeze/thaw cycles.<br/>           Store at 4 degree C for frequent use.<br/>           Aliquot and store at -20 degree C for 24 months.</p> <p><b>Stability Test:</b><br/>           The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37 degree C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.</p> |
