

Human Hornerin (HRNR) ELISA Kit | HRNR elisa kit

Human Hornerin (HRNR) ELISA Kit

CATALOG #
AAA135632

REACTIVITY
Human

PRODUCT SYNONYMS

Hornerin (HRNR); Human Hornerin (HRNR) ELISA Kit; S100a18; HRNR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Hornerin (HRNR). No significant cross-reactivity or interference between Hornerin (HRNR) and analogues was observed.
Sequence Length	2850
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	78-5,000pg/mL
Sensitivity	32pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Hornerin (HRNR) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Hornerin (HRNR) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for HRNR elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Hornerin (HRNR). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Hornerin (HRNR). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Hornerin (HRNR), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Hornerin (HRNR) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for HRNR elisa kit	Metabolic pathway

NCBI AND UNIPROT INFORMATION

NCBI GI #	57864582
NCBI GeneID	388697
NCBI Accession #	NP_001009931.1
NCBI GenBank Nucleotide #	NM_001009931.2
UniProt Accession #	Q86YZ3; Q5DT20; Q5U1F4
Molecular Weight	282,390 Da
NCBI Official Full Name	hornerin
NCBI Official Synonym Full Names	hornerin
NCBI Official Symbol	HRNR
NCBI Official Synonym Symbols	FLG3; S100A16; S100a18
NCBI Protein Information	hornerin
UniProt Protein Name	Hornerin
UniProt Gene Name	HRNR
UniProt Synonym Gene Names	S100A18
UniProt Entry Name	HORN_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
