

Human Beta-Lipotropic Hormone (bLPH) ELISA Kit | bLPH elisa kit

Human Beta-Lipotropic Hormone (bLPH) ELISA Kit

CATALOG #
AAA135748

REACTIVITY
Human

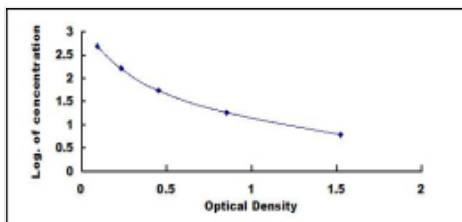

PRODUCT SYNONYMS

Beta-Lipotropic Hormone (bLPH); Human Beta-Lipotropic Hormone (bLPH) ELISA Kit; beta-Lipotropin; B-LPH; b-Lipotropin; bLPH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Beta-Lipotropic Hormone (bLPH). No significant cross-reactivity or interference between Beta-Lipotropic Hormone (bLPH) and analogues was observed.
Sequence Length	354
Assay Type	Competitive Inhibition
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	6.17-500pg/mL
Sensitivity	2.48pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Beta-Lipotropic Hormone (bLPH) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Beta-Lipotropic Hormone (bLPH) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for bLPH elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Beta-Lipotrophic Hormone (bLPH) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Beta-Lipotrophic Hormone (bLPH) and unlabeled Beta-Lipotrophic Hormone (bLPH) (Standards or samples) with the pre-coated antibody specific to Beta-Lipotrophic Hormone (bLPH). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Beta-Lipotrophic Hormone (bLPH) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Beta-Lipotrophic Hormone (bLPH) in the sample.
Product Categories/Family for bLPH elisa kit	Metabolic pathway; Endocrinology; Hormone metabolism

NCBI AND UNIPROT INFORMATION

NCBI GI #	344190512
Molecular Weight	41,099 Da
NCBI Official Full Name	BlpH
UniProt Protein Name	BlpH
UniProt Gene Name	blpH
UniProt Entry Name	G3ECC5_STREE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
