

Human N-Acetylgalactosaminidase Alpha (NAGa) ELISA Kit | NAGa elisa kit

Human N-Acetylgalactosaminidase Alpha (NAGa) ELISA Kit

CATALOG #
AAA136102

REACTIVITY
Human

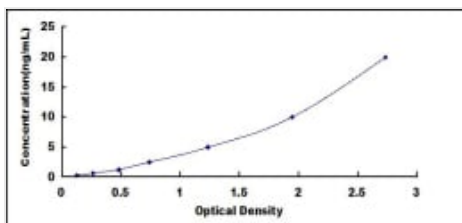

PRODUCT SYNONYMS

N-Acetylgalactosaminidase Alpha (NAGa); Human N-Acetylgalactosaminidase Alpha (NAGa) ELISA Kit; Alpha-N-Acetylgalactosaminidase; Alpha-galactosidase B; NAGa elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of N-Acetylgalactosaminidase Alpha (NAGa). No significant cross-reactivity or interference between N-Acetylgalactosaminidase Alpha (NAGa) and analogues was observed.
Sequence Length	411
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	0.131ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level N-Acetylgalactosaminidase Alpha (NAGa) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level N-Acetylgalactosaminidase Alpha (NAGa) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for NAGa elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to N-Acetylgalactosaminidase Alpha (NAGa). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to N-Acetylgalactosaminidase Alpha (NAGa). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain N-Acetylgalactosaminidase Alpha (NAGa), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of N-Acetylgalactosaminidase Alpha (NAGa) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for NAGa elisa kit	Enzyme & Kinase

NCBI AND UNIPROT INFORMATION

NCBI GI #	119580890
NCBI GeneID	4668
UniProt Accession #	P17050
Molecular Weight	46,565 Da
NCBI Official Full Name	N-acetylgalactosaminidase, alpha-, isoform CRA_a
NCBI Official Synonym Full Names	N-acetylgalactosaminidase, alpha-
NCBI Official Symbol	NAGA
NCBI Official Synonym Symbols	GALB; D22S674
NCBI Protein Information	alpha-N-acetylgalactosaminidase
UniProt Protein Name	Alpha-N-acetylgalactosaminidase
UniProt Gene Name	NAGA
UniProt Entry Name	NAGAB_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
