

Human Sucrase Isomaltase (SI) ELISA Kit | SI elisa kit

Human Sucrase Isomaltase (SI) ELISA Kit

CATALOG #
AAA136198

REACTIVITY
Human

PRODUCT SYNONYMS

Sucrase Isomaltase (SI); Human Sucrase Isomaltase (SI) ELISA Kit; Oligosaccharide Alpha-1; 6-Glucosidase; SI elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Sucrase Isomaltase (SI). No significant cross-reactivity or interference between Sucrase Isomaltase (SI) and analogues was observed.
Sequence Length	1827
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	0.117ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Sucrase Isomaltase (SI) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Sucrase Isomaltase (SI) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for SI elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Sucrase Isomaltase (SI). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Sucrase Isomaltase (SI). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Sucrase Isomaltase (SI), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Sucrase Isomaltase (SI) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for SI elisa kit	Enzyme & Kinase

NCBI AND UNIPROT INFORMATION

NCBI GI #	157364974
NCBI GeneID	6476
NCBI Accession #	NP_001032.2
NCBI GenBank Nucleotide #	NM_001041.3
UniProt Accession #	P14410; Q1JQ80; Q1RMC2; A2RUC3
Molecular Weight	209,453 Da
NCBI Official Full Name	sucrase-isomaltase, intestinal
NCBI Official Synonym Full Names	sucrase-isomaltase (alpha-glucosidase)
NCBI Official Symbol	SI
NCBI Protein Information	sucrase-isomaltase, intestinal
UniProt Protein Name	Sucrase-isomaltase, intestinal
UniProt Gene Name	SI
UniProt Entry Name	SUIS_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
