

Human Phospholipase A2, Group X (PLA2G10) ELISA Kit | PLA2G10 elisa kit

Human Phospholipase A2, Group X (PLA2G10) ELISA Kit

CATALOG #
AAA136299

REACTIVITY
Human

PRODUCT SYNONYMS

Phospholipase A2; Group X (PLA2G10); Human Phospholipase A2; Group X (PLA2G10) ELISA Kit; GXPLA2; GX sPLA2; sPLA2-X; Group 10 secretory phospholipase A2; Phosphatidylcholine 2-acylhydrolase 10; PLA2G10 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Phospholipase A2, Group X (PLA2G10). No significant cross-reactivity or interference between Phospholipase A2, Group X (PLA2G10) and analogues was observed.
Sequence Length	165
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma and other biological fluids
Detection Range	7.8-500pg/mL
Sensitivity	2.9pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Phospholipase A2, Group X (PLA2G10) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Phospholipase A2, Group X (PLA2G10) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for PLA2G10 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Phospholipase A2, Group X (PLA2G10). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Phospholipase A2, Group X (PLA2G10). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Phospholipase A2, Group X (PLA2G10), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Phospholipase A2, Group X (PLA2G10) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for PLA2G10 elisa kit	Enzyme & Kinase

NCBI AND UNIPROT INFORMATION

NCBI GI #	109730371
NCBI GeneID	8399
UniProt Accession #	O15496; Q14DU3; Q6NT23
Molecular Weight	18,153 Da
NCBI Official Full Name	Phospholipase A2, group X
NCBI Official Synonym Full Names	phospholipase A2, group X
NCBI Official Symbol	PLA2G10
NCBI Official Synonym Symbols	SPLA2; GXPLA2; GXsPLA2
NCBI Protein Information	group 10 secretory phospholipase A2
UniProt Protein Name	Group 10 secretory phospholipase A2
UniProt Gene Name	PLA2G10
UniProt Synonym Gene Names	GX sPLA2; sPLA2-X
UniProt Entry Name	PA2GX_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
