

## Horse Interleukin 12B (IL12B) ELISA Kit | IL12B elisa kit

Horse Interleukin 12B (IL12B) ELISA Kit

CATALOG #  
AAA136347

REACTIVITY  
Horse

### PRODUCT SYNONYMS

Interleukin 12B (IL12B); Horse Interleukin 12B (IL12B) ELISA Kit; p40; IL12-B; CLMF2; NKSF2; Natural Killer Cell Stimulatory Factor 2; Cytotoxic Lymphocyte Maturation Factor 2; Interleukin 23; P40 Subunit; IL12B elisa kit

| Reactivity                                        | Horse                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Interleukin 12B (IL12B). No significant cross-reactivity or interference between Interleukin 12B (IL12B) and analogues was observed.                                                                                                                                                                                                                                                                            |
| Sequence Length                                   | 328                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Sensitivity                                       | 6.2pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Application                                       | Enzyme-linked immunosorbent assay for Antigen Detection.                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Intra-assay Precision (Precision within an assay) | 3 samples with low, middle and high level Interleukin 12B (IL12B) were tested 20 times on one plate, respectively.                                                                                                                                                                                                                                                                                                                                                                         |
| Inter-assay Precision (Precision between assays)  | 3 samples with low, middle and high level Interleukin 12B (IL12B) were tested on 3 different plates, 8 replicates in each plate.                                                                                                                                                                                                                                                                                                                                                           |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for IL12B elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Interleukin 12B (IL12B). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Interleukin 12B (IL12B). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Interleukin 12B (IL12B), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Interleukin 12B (IL12B) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| Product Categories/Family for IL12B elisa kit   | Cytokine; Infection immunity; Immune molecule                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
