

## Human X-Box Binding Protein 1 (XBP1) ELISA Kit | XBP1 elisa kit

Human X-Box Binding Protein 1 (XBP1) ELISA Kit

CATALOG #  
**AAA136658**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

X-Box Binding Protein 1 (XBP1); Human X-Box Binding Protein 1 (XBP1) ELISA Kit; TREB5; XBP2; Tax-responsive element-binding protein 5; XBP1 elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity                                        | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of X-Box Binding Protein 1 (XBP1). No significant cross-reactivity or interference between X-Box Binding Protein 1 (XBP1) and analogues was observed.                                                                                                                                                                                                                                                              |
| Sequence Length                                   | 255                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for XBP1 elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to X-Box Binding Protein 1 (XBP1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to X-Box Binding Protein 1 (XBP1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain X-Box Binding Protein 1 (XBP1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of X-Box Binding Protein 1 (XBP1) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| Product Categories/Family for XBP1 elisa kit   | Immune molecule                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| NCBI Protein Information         | X-box binding protein 1 |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
