

Human Connexin 40 (CX40) ELISA Kit | CX40 elisa kit

Human Connexin 40 (CX40) ELISA Kit

CATALOG #
AAA136870

REACTIVITY
Human

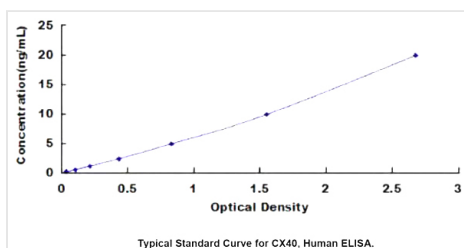

PRODUCT SYNONYMS

Connexin 40 (CX40); Human Connexin 40 (CX40) ELISA Kit; GJA5; GJ-A5; Gap Junction Protein Alpha 5; CX40 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of CX40. No significant cross-reactivity or interference between CX40 and analogues was observed.
Sequence Length	358
Assay Type	Quantitative Sandwich
Samples	Human tissue homogenates, cell lysates and other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	< 0.114ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level CX40 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level CX40 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for CX40 elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to CX40. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to CX40. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain CX40, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of CX40 in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of CX40 in human tissue homogenates, cell lysates and other biological fluids.
Product Categories/Family for CX40 elisa kit	Infection immunity; Cardiovascular biology; Developmental science

NCBI AND UNIPROT INFORMATION

NCBI GI #	1220303
NCBI GeneID	2702
UniProt Accession #	P36382; Q5T3B6; Q5U0N6
Molecular Weight	40,380 Da
NCBI Official Full Name	connexin 40
NCBI Official Synonym Full Names	gap junction protein, alpha 5, 40kDa
NCBI Official Symbol	GJA5
NCBI Official Synonym Symbols	CX40; ATFB11
NCBI Protein Information	gap junction alpha-5 protein
UniProt Protein Name	Gap junction alpha-5 protein
UniProt Gene Name	GJA5
UniProt Synonym Gene Names	Cx40
UniProt Entry Name	CXA5_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
