

Human Small Heterodimer Partner (SHP) ELISA Kit | SHP elisa kit

Human Small Heterodimer Partner (SHP) ELISA Kit

CATALOG #
AAA137018

REACTIVITY
Human

PRODUCT SYNONYMS

Small Heterodimer Partner (SHP); Human Small Heterodimer Partner (SHP) ELISA Kit; NR0B2; SHP1; Nuclear Receptor Subfamily 0; Group B; Member 2; Orphan nuclear receptor SHP; SHP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Small Heterodimer Partner (SHP). No significant cross-reactivity or interference between Small Heterodimer Partner (SHP) and analogues was observed.
Sequence Length	257
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.054ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Small Heterodimer Partner (SHP) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Small Heterodimer Partner (SHP) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for SHP elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Small Heterodimer Partner (SHP). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Small Heterodimer Partner (SHP). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Small Heterodimer Partner (SHP), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Small Heterodimer Partner (SHP) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for SHP elisa kit	Signal transduction; Endocrinology; Developmental science; Hormone metabolism

NCBI AND UNIPROT INFORMATION

NCBI GI #	15787843
NCBI GeneID	8431
UniProt Accession #	Q15466; Q5QP36; F1D8P5
Molecular Weight	28,058 Da
NCBI Official Full Name	small heterodimer partner
NCBI Official Synonym Full Names	nuclear receptor subfamily 0, group B, member 2
NCBI Official Symbol	NR0B2
NCBI Official Synonym Symbols	SHP; SHP1
NCBI Protein Information	nuclear receptor subfamily 0 group B member 2
UniProt Protein Name	Nuclear receptor subfamily 0 group B member 2
UniProt Gene Name	NR0B2
UniProt Synonym Gene Names	SHP
UniProt Entry Name	NR0B2_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
