

Human Stratifin (SFN) ELISA Kit | SFN elisa kit

Human Stratifin (SFN) ELISA Kit

CATALOG #
AAA137185

REACTIVITY
Human

PRODUCT SYNONYMS

Stratifin (SFN); Human Stratifin (SFN) ELISA Kit; YWHAS; HME1; 14-3-3 Protein Sigma; Epithelial cell marker protein 1; SFN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of stratifin. No significant cross-reactivity or interference between stratifin and analogues was observed.
Sequence Length	248
Assay Type	Quantitative Sandwich
Samples	Human serum, plasma, cerebrospinal fluid and other biological fluids
Detection Range	31.2-2,000pg/mL
Sensitivity	< 13.3pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level stratifin were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level stratifin were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for SFN elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to stratifin. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to stratifin. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain stratifin, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of stratifin in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of stratifin in human serum, plasma, cerebrospinal fluid and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	23270783
NCBI GeneID	2810
UniProt Accession #	P31947; Q6FH30; Q6FH51; Q96DH0
Molecular Weight	24,336 Da
NCBI Official Full Name	Stratifin
NCBI Official Synonym Full Names	stratifin
NCBI Official Symbol	SFN
NCBI Official Synonym Symbols	YWHAS
NCBI Protein Information	14-3-3 protein sigma
UniProt Protein Name	14-3-3 protein sigma
UniProt Gene Name	SFN
UniProt Synonym Gene Names	HME1
UniProt Entry Name	1433S_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
