

Human Hephaestin (HEPH) ELISA Kit | HEPH elisa kit

Human Hephaestin (HEPH) ELISA Kit

CATALOG #
AAA137675

REACTIVITY
Human

PRODUCT SYNONYMS

Hephaestin (HEPH); Human Hephaestin (HEPH) ELISA Kit; CPL; HEPH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Hephaestin (HEPH). No significant cross-reactivity or interference between Hephaestin (HEPH) and analogues was observed.
Sequence Length	891
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates and other biological fluids
Detection Range	1.56-100ng/mL
Sensitivity	0.59ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Hephaestin (HEPH) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Hephaestin (HEPH) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for HEPH elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Hephaestin (HEPH). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Hephaestin (HEPH). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Hephaestin (HEPH), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Hephaestin (HEPH) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for HEPH elisa kit	Hematology

NCBI AND UNIPROT INFORMATION

NCBI GI #	12830539
NCBI GeneID	9843
UniProt Accession #	Q9BQS7; O75180; Q6UW45; Q9C058; B1AJX8; D3DVT7; E9PHN8
Molecular Weight	100,624 Da
NCBI Official Full Name	hephaestin
NCBI Official Synonym Full Names	hephaestin
NCBI Official Symbol	HEPH
NCBI Official Synonym Symbols	CPL
NCBI Protein Information	hephaestin
UniProt Protein Name	Hephaestin
UniProt Gene Name	HEPH
UniProt Synonym Gene Names	KIAA0698
UniProt Entry Name	HEPH_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
