

Human Alpha-Hemoglobin Stabilizing Protein (aHSP) ELISA Kit | aHSP elisa kit

Human Alpha-Hemoglobin Stabilizing Protein (aHSP) ELISA Kit

CATALOG #
AAA138034

REACTIVITY
Human

PRODUCT SYNONYMS

Alpha-Hemoglobin Stabilizing Protein (aHSP); Human Alpha-Hemoglobin Stabilizing Protein (aHSP) ELISA Kit; A-HSP; ERAF; EDRF; Erythroid Associated Factor; Erythroid differentiation-related factor; aHSP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Alpha-Hemoglobin Stabilizing Protein (aHSP). No significant cross-reactivity or interference between Alpha-Hemoglobin Stabilizing Protein (aHSP) and analogues was observed.
Sequence Length	102
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	31.2-2,000pg/mL
Sensitivity	13.3pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Alpha-Hemoglobin Stabilizing Protein (aHSP) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Alpha-Hemoglobin Stabilizing Protein (aHSP) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for aHSP elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Alpha-Hemoglobin Stabilizing Protein (aHSP). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Alpha-Hemoglobin Stabilizing Protein (aHSP). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Alpha-Hemoglobin Stabilizing Protein (aHSP), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Alpha-Hemoglobin Stabilizing Protein (aHSP) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for aHSP elisa kit	Metabolic pathway; Infection immunity; Cardiovascular biology

NCBI AND UNIPROT INFORMATION

NCBI GI #	7706180
NCBI GeneID	51327
NCBI Accession #	NP_057717.1
NCBI GenBank Nucleotide #	NM_016633.2
UniProt Accession #	Q9NZD4; Q8TD01
Molecular Weight	11,840 Da
NCBI Official Full Name	alpha-hemoglobin-stabilizing protein
NCBI Official Synonym Full Names	alpha hemoglobin stabilizing protein
NCBI Official Symbol	AHSP
NCBI Official Synonym Symbols	EDRF; ERAF
NCBI Protein Information	alpha-hemoglobin-stabilizing protein
UniProt Protein Name	Alpha-hemoglobin-stabilizing protein
UniProt Gene Name	AHSP
UniProt Synonym Gene Names	EDRF; ERAF
UniProt Entry Name	AHSP_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
