

Human Hexosaminidase B Beta (HEXb) ELISA Kit | HEXb elisa kit

Human Hexosaminidase B Beta (HEXb) ELISA Kit

CATALOG #
AAA138387

REACTIVITY
Human

PRODUCT SYNONYMS

Hexosaminidase B Beta (HEXb); Human Hexosaminidase B Beta (HEXb) ELISA Kit; Hex-B; ENC-1AS; HCC-7; Beta-N-acetylhexosaminidase subunit beta; Cervical cancer proto-oncogene 7 protein; N-acetyl-beta-glucosaminidase subunit beta; HEXb elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of HEXb. No significant cross-reactivity or interference between HEXb and analogues was observed.
Sequence Length	556
Assay Type	Quantitative Sandwich
Samples	Human serum, plasma, tissue homogenates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.062ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level HEXb were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level HEXb were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for HEXb elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to HEXb. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to HEXb. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain HEXb, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of HEXb in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of HEXb in human serum, plasma, tissue homogenates and other biological fluids.
Product Categories/Family for HEXb elisa kit	Enzyme & Kinase; Metabolic pathway; Tumor immunity; Neuroscience

NCBI AND UNIPROT INFORMATION

NCBI GI #	119616148
NCBI GeneID	3074
UniProt Accession #	P07686
Molecular Weight	63,111 Da
NCBI Official Full Name	hexosaminidase B (beta polypeptide), isoform CRA_a
NCBI Official Synonym Full Names	hexosaminidase B (beta polypeptide)
NCBI Official Symbol	HEXB
NCBI Official Synonym Symbols	ENC-1AS; HEL-248
NCBI Protein Information	beta-hexosaminidase subunit beta
UniProt Protein Name	Beta-hexosaminidase subunit beta
UniProt Gene Name	HEXB
UniProt Synonym Gene Names	Hexosaminidase subunit B; HCC-7
UniProt Entry Name	HEXB_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
