

Human Interleukin 23 Receptor (IL23R) ELISA Kit | IL23R elisa kit

Human Interleukin 23 Receptor (IL23R) ELISA Kit

CATALOG #
AAA138480

REACTIVITY
Human

PRODUCT SYNONYMS

Interleukin 23 Receptor (IL23R); Human Interleukin 23 Receptor (IL23R) ELISA Kit; IL23R elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Interleukin 23 Receptor (IL23R). No significant cross-reactivity or interference between Interleukin 23 Receptor (IL23R) and analogues was observed.
Sequence Length	335
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	0.055ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Interleukin 23 Receptor (IL23R) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Interleukin 23 Receptor (IL23R) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for IL23R elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Interleukin 23 Receptor (IL23R). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Interleukin 23 Receptor (IL23R). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Interleukin 23 Receptor (IL23R), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Interleukin 23 Receptor (IL23R) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for IL23R elisa kit	Infection immunity

NCBI AND UNIPROT INFORMATION

NCBI GI #	211639210
NCBI GeneID	149233
UniProt Accession #	B6VNT7; Q5VWK5
Molecular Weight	38,062 Da
NCBI Official Full Name	interleukin 23 receptor, partial
NCBI Official Synonym Full Names	interleukin 23 receptor
NCBI Official Symbol	IL23R
NCBI Protein Information	interleukin-23 receptor
UniProt Protein Name	Interleukin 23 receptor
UniProt Gene Name	IL23R
UniProt Entry Name	B6VNT7_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
