

Goat Cre Polyclonal Antibody | anti-Cre antibody

Cre Recombinase Polyclonal Antibody

CATALOG # AAA13864	HOST Goat	REACTIVITY Bacteriophage P1	APPLICATIONS Western Blot
------------------------------	---------------------	---------------------------------------	-------------------------------------

PRODUCT SYNONYMS

Cre; Polyclonal Antibody; Cre Recombinase Polyclonal Antibody; Cyclization recombinase antibody; anti-Cre antibody

PRODUCT SPECIFICATIONS

Host	Goat
Reactivity	Bacteriophage P1
Clonality	Polyclonal
Specificity	In 293HEK cells transduced with Ad-Cre detects a band of 38 kDa by Western blot and gives a positive signal for the Cre recombinase protein.
Form/Format	Polyclonal antibody supplied as 200ul (3 mg/ml) aliquot in PBS, 20% glycerol and 0.05% sodium azide. This antibody is epitope-affinity purified from goat antiserum.
Applicable Applications for anti-Cre antibody	WB (Western Blot)
Application Notes	Western Blot: 1:500-1:2,000
Immunogen	Purified recombinant peptide produced in E. coli
Handling	The antibody solution should be gently mixed before use.
Preparation and Storage	Store at -20°C for long term storage. Store at 2-8°C for up to one month Avoid freeze/thaw cycles.

Reactivity Chart

WB (Western Blot)

Anti-Cre Ab at 2000 dilution; rabbit polyclonal to goat IgG (HRP) at 1:10000 dilution.

ADDITIONAL INFORMATION

Related Product Information for anti-Cre antibody	Goat polyclonal antibody to Cre recombinase. Cre recombinase is a tyrosine recombinase enzyme derived from the P1 bacteriophage. The enzyme (38 kDa) is a member of the Integrase family of site specific recombinase and it is known to catalyse the site specific recombination event between two DNA recognition sites (loxP sites).
---	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
