

Rat Protein Zero, Myelin (MPZ) ELISA Kit | MPZ elisa kit

Rat Protein Zero, Myelin (MPZ) ELISA Kit

CATALOG #
AAA138680

REACTIVITY
Rat

PRODUCT SYNONYMS

Protein Zero; Myelin (MPZ); Rat Protein Zero; Myelin (MPZ) ELISA Kit; P0; DSS; CHM; CMT4E; CMT1; CMT1B; CMT2I; CMT2J; CMTDI3; HMSNIB; MPP; Myelin Protein Zero; Charcot-Marie-Tooth Neuropathy 1B; Myelin peripheral protein; MPZ elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Protein Zero, Myelin (MPZ). No significant cross-reactivity or interference between Protein Zero, Myelin (MPZ) and analogues was observed.
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	0.122ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Protein Zero, Myelin (MPZ) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Protein Zero, Myelin (MPZ) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for MPZ elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Protein Zero, Myelin (MPZ) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Protein Zero, Myelin (MPZ) and unlabeled Protein Zero, Myelin (MPZ) (Standards or samples) with the pre-coated antibody specific to Protein Zero, Myelin (MPZ). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Protein Zero, Myelin (MPZ) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Protein Zero, Myelin (MPZ) in the sample.
Product Categories/Family for MPZ elisa kit	Metabolic pathway; Infection immunity; Neuroscience

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
