

Mouse Myotrophin (MTPN) ELISA Kit | MTPN elisa kit

Mouse Myotrophin (MTPN) ELISA Kit

CATALOG #
AAA138736

REACTIVITY
Mouse

PRODUCT SYNONYMS

Myotrophin (MTPN); Mouse Myotrophin (MTPN) ELISA Kit; GCDP; V-1; Granule Cell Differentiation Protein; MTPN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Myotrophin (MTPN). No significant cross-reactivity or interference between Myotrophin (MTPN) and analogues was observed.
Sequence Length	118
Assay Type	Double-antibody Sandwich
Samples	Serum, Plasma, Tissue homogenates, Cell lysates, Cell culture supernates and other biological fluids
Detection Range	6.25-400pg/mL
Sensitivity	2.55pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Myotrophin (MTPN) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Myotrophin (MTPN) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for MTPN elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Myotrophin (MTPN). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Myotrophin (MTPN). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Myotrophin (MTPN), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Myotrophin (MTPN) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for MTPN elisa kit	Metabolic pathway

NCBI AND UNIPROT INFORMATION

NCBI GI #	21956645
NCBI GeneID	136319
NCBI Accession #	NP_665807.1
NCBI GenBank Nucleotide #	NM_145808.3
UniProt Accession #	P58546
Molecular Weight	12,895 Da
NCBI Official Full Name	myotrophin
NCBI Official Synonym Full Names	myotrophin
NCBI Official Symbol	MTPN
NCBI Official Synonym Symbols	V-1; GCDP
NCBI Protein Information	myotrophin
UniProt Protein Name	Myotrophin
UniProt Gene Name	MTPN
UniProt Entry Name	MTPN_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
