

## Rat Apolipoprotein A5 (APOA5) ELISA Kit | APOA5 elisa kit

Rat Apolipoprotein A5 (APOA5) ELISA Kit

CATALOG #  
AAA138985

REACTIVITY  
Rat

### PRODUCT SYNONYMS

Apolipoprotein A5 (APOA5); Rat Apolipoprotein A5 (APOA5) ELISA Kit; Apo-A5; APOA-V; APOAV; RAP3; Regeneration-associated protein 3; APOA5 elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity                                        | Rat                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Apolipoprotein A5 (APOA5). No significant cross-reactivity or interference between Apolipoprotein A5 (APOA5) and analogues was observed.                                                                                                                                                                                                                                                                        |
| Sequence Length                                   | 366                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for APOA5 elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Apolipoprotein A5 (APOA5). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Apolipoprotein A5 (APOA5). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Apolipoprotein A5 (APOA5), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Apolipoprotein A5 (APOA5) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| Product Categories/Family for APOA5 elisa kit   | Metabolic pathway; Endocrinology; Cardiovascular biology; Hepatology; Nutrition metabolism                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
