

## Human Creatine Kinase, Brain (CKB) ELISA Kit | CKB elisa kit

Human Creatine Kinase, Brain (CKB) ELISA Kit

CATALOG #  
AAA139103

REACTIVITY  
Human

### PRODUCT SYNONYMS

Creatine Kinase; Brain (CKB); Human Creatine Kinase; Brain (CKB) ELISA Kit; CK-BB; CKBB; CK-B; CK-1; CKB elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity                                        | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Creatine Kinase, Brain (CKB). No significant cross-reactivity or interference between Creatine Kinase, Brain (CKB) and analogues was observed.                                                                                                                                                                                                                                                                  |
| Sequence Length                                   | 381                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Assay Type                                        | Double-antibody Sandwich                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for CKB elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Creatine Kinase, Brain (CKB). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Creatine Kinase, Brain (CKB). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Creatine Kinase, Brain (CKB), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Creatine Kinase, Brain (CKB) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| Product Categories/Family for CKB elisa kit   | Enzyme & Kinase; Metabolic pathway; Cardiovascular biology; Neuroscience                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

NCBI AND UNIPROT INFORMATION

| NCBI Official Synonym Symbols    | BCK; B-CK; CKBB; HEL-211; HEL-S-29             |
| NCBI Protein Information         | creatine kinase B-type                         |
| UniProt Protein Name             | Creatine kinase B-type                         |
| UniProt Gene Name                | CKB                                            |
| UniProt Synonym Gene Names       | CKBB                                           |
| UniProt Entry Name               | KCRB_HUMAN                                     |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
