

## Rat Insulin Like Protein 3 (INSL3) ELISA Kit | INSL3 elisa kit

Rat Insulin Like Protein 3 (INSL3) ELISA Kit

CATALOG #  
**AAA139355**

REACTIVITY  
**Rat**

### PRODUCT SYNONYMS

Insulin Like Protein 3 (INSL3); Rat Insulin Like Protein 3 (INSL3) ELISA Kit; RLNL; RLF; Relaxin-Like Factor; Leydig Cell; Leydig insulin-like peptide; INSL3 elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity                                        | Rat                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Insulin Like Protein 3 (INSL3). No significant cross-reactivity or interference between Insulin Like Protein 3 (INSL3) and analogues was observed.                                                                                                                                                                                                                                                              |
| Assay Type                                        | Competitive Inhibition                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Samples                                           | Serum, Plasma and other biological fluids                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Detection Range                                   | 185.19-15000pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Sensitivity                                       | 62.8pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Application                                       | Enzyme-linked immunosorbent assay for Antigen Detection.                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Intra-assay Precision (Precision within an assay) | 3 samples with low, middle and high level Insulin Like Protein 3 (INSL3) were tested 20 times on one plate, respectively.                                                                                                                                                                                                                                                                                                                                                                  |
| Inter-assay Precision (Precision between assays)  | 3 samples with low, middle and high level Insulin Like Protein 3 (INSL3) were tested on 3 different plates, 8 replicates in each plate.                                                                                                                                                                                                                                                                                                                                                    |
| CV(%) =                                           | SD/meanX100                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Intra-Assay                                       | CV<10%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for INSL3 elisa kit | This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Insulin Like Protein 3 (INSL3) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Insulin Like Protein 3 (INSL3) and unlabeled Insulin Like Protein 3 (INSL3) (Standards or samples) with the pre-coated antibody specific to Insulin Like Protein 3 (INSL3). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Insulin Like Protein 3 (INSL3) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Insulin Like Protein 3 (INSL3) in the sample. |
