

## Rat Lipase, Hormone Sensitive (LIPE) ELISA Kit | LIPE elisa kit

Rat Lipase, Hormone Sensitive (LIPE) ELISA Kit

CATALOG #  
AAA139378

REACTIVITY  
Rat

### PRODUCT SYNONYMS

Lipase; Hormone Sensitive (LIPE); Rat Lipase; Hormone Sensitive (LIPE) ELISA Kit; HSL; LHS; Hormone Sensitive Lipase; LIPE elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity                                        | Rat                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Lipase, Hormone Sensitive (LIPE). No significant cross-reactivity or interference between Lipase, Hormone Sensitive (LIPE) and analogues was observed.                                                                                                                                                                                                                                                          |
| Sequence Length                                   | 775                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for LIPE elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Lipase, Hormone Sensitive (LIPE). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Lipase, Hormone Sensitive (LIPE). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Lipase, Hormone Sensitive (LIPE), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Lipase, Hormone Sensitive (LIPE) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| Product Categories/Family for LIPE elisa kit   | Metabolic pathway                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
