

Mouse Wolfram Syndrome Protein 1 (WFS1) ELISA Kit | WFS1 elisa kit

Mouse Wolfram Syndrome Protein 1 (WFS1) ELISA Kit

CATALOG #
AAA139686

REACTIVITY
Mouse

PRODUCT SYNONYMS

Wolfram Syndrome Protein 1 (WFS1); Mouse Wolfram Syndrome Protein 1 (WFS1) ELISA Kit; DFNA14; DFNA38; DFNA6; DIDMOAD; WFRS; WFS; Wolframin; WFS1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Wolfram Syndrome Protein 1 (WFS1). No significant cross-reactivity or interference between Wolfram Syndrome Protein 1 (WFS1) and analogues was observed.
Sequence Length	890
Assay Type	Double-antibody Sandwich
Samples	Tissue homogenates, Cell lysates and other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	0.114ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Wolfram Syndrome Protein 1 (WFS1) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Wolfram Syndrome Protein 1 (WFS1) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for WFS1 elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Wolfram Syndrome Protein 1 (WFS1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Wolfram Syndrome Protein 1 (WFS1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Wolfram Syndrome Protein 1 (WFS1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Wolfram Syndrome Protein 1 (WFS1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for WFS1 elisa kit	Neuroscience

NCBI AND UNIPROT INFORMATION

NCBI GI #	119602804
NCBI GeneID	7466
UniProt Accession #	O76024; Q8N6I3; Q9UNW6; B2R797; D3DVT1
Molecular Weight	100,292 Da
NCBI Official Full Name	Wolfram syndrome 1 (wolframin), isoform CRA_a
NCBI Official Synonym Full Names	Wolfram syndrome 1 (wolframin)
NCBI Official Symbol	WFS1
NCBI Official Synonym Symbols	WFS; WFRS; WFSL; CTRCT41
NCBI Protein Information	wolframin
UniProt Protein Name	Wolframin
UniProt Gene Name	WFS1
UniProt Entry Name	WFS1_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
