

Human Hemogen (HEMGN) ELISA Kit | HEMGN elisa kit

Human Hemogen (HEMGN) ELISA Kit

CATALOG #
AAA139804

REACTIVITY
Human

PRODUCT SYNONYMS

Hemogen (HEMGN); Human Hemogen (HEMGN) ELISA Kit; EDAG; EDAG-1; NDR; Erythroid differentiation-associated gene protein; Hemopoietic gene protein; Negative differentiation regulator protein; HEMGN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Hemogen (HEMGN). No significant cross-reactivity or interference between Hemogen (HEMGN) and analogues was observed.
Sequence Length	484
Assay Type	Double-antibody Sandwich
Samples	Tissue Homogenates And Other Biological Fluids.
Detection Range	0.156-10ng/mL
Sensitivity	0.052ng/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Hemogen (HEMGN) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Hemogen (HEMGN) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for HEMGN elisa kit	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Hemogen (HEMGN). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Hemogen (HEMGN). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Hemogen (HEMGN), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Hemogen (HEMGN) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
Product Categories/Family for HEMGN elisa kit	Hematology

NCBI AND UNIPROT INFORMATION

NCBI GI #	37574622
NCBI GeneID	55363
NCBI Accession #	NP_060907.2
NCBI GenBank Nucleotide #	NM_018437.4
UniProt Accession #	Q9BXL5; Q6XAR3; Q86XY5; Q9NPC0
Molecular Weight	55,341 Da
NCBI Official Full Name	hemogen
NCBI Official Synonym Full Names	hemogen
NCBI Official Symbol	HEMGN
NCBI Official Synonym Symbols	NDR; EDAG; CT155; EDAG-1
NCBI Protein Information	hemogen
UniProt Protein Name	Hemogen
UniProt Gene Name	HEMGN
UniProt Synonym Gene Names	EDAG; NDR; EDAG-1
UniProt Entry Name	HEMGN_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
