

Human Laminin Beta 1 (LAMB1) ELISA Kit | LAMB1 elisa kit

Human Laminin Beta 1 (LAMB1) ELISA Kit

CATALOG #
AAA139930

REACTIVITY
Human

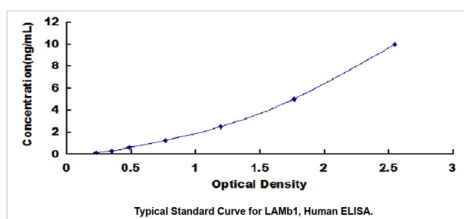

PRODUCT SYNONYMS

Laminin Beta 1 (LAMB1); Human Laminin Beta 1 (LAMB1) ELISA Kit; LAM-B1; CLM; Cutis Laxa With Marfanoid Phenotype; LAMB1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of LAMB1. No significant cross-reactivity or interference between LAMB1 and analogues was observed.
Sequence Length	1788
Assay Type	Quantitative Sandwich
Samples	Human serum, plasma, tissue homogenates and other biological fluids
Detection Range	0.156-10ng/mL
Sensitivity	< 0.063ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level LAMB1 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level LAMB1 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for LAMb1 elisa kit	Principle of the Assay: The microplate provided in this kit has been pre-coated with an antibody specific to LAMb1. Standards or samples are then added to the appropriate microplate wells with a biotin-conjugated antibody specific to LAMb1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain LAMb1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of LAMb1 in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of LAMb1 in human serum, plasma, tissue homogenates and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	24582614
NCBI GeneID	34068
NCBI Accession #	NP_723319.1
NCBI GenBank Nucleotide #	NM_164773.3
Molecular Weight	198,333 Da
NCBI Official Full Name	LanB1, isoform B
NCBI Official Symbol	LanB1
NCBI Official Synonym Symbols	BcDNA:LD21794; beta1; CG7123; CT22015; DmelCG7123; EP-600; Lam-B1; lamB1; LamB1; Lambeta; Lan B1; LanB; LM-B1/beta; msp1
NCBI Protein Information	CG7123 gene product from transcript CG7123-RA
UniProt Protein Name	Laminin subunit beta-1
UniProt Gene Name	LanB1
UniProt Synonym Gene Names	lamB1
UniProt Entry Name	LAMB1_DROME

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
