

## Human Relaxin (RLN) ELISA Kit | RLN elisa kit

Human Relaxin (RLN) ELISA Kit

CATALOG #  
**AAA139937**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Relaxin (RLN); Human Relaxin (RLN) ELISA Kit; RLXH1; Relaxin H1; Prorelaxin H1; RLN elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity                                        | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Relaxin (RLN). No significant cross-reactivity or interference between Relaxin (RLN) and analogues was observed.                                                                                                                                                                                                                                                                                                |
| Sequence Length                                   | 117                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Assay Type                                        | Competitive Inhibition                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Sensitivity                                       | 1.4pg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Application                                       | Enzyme-linked immunosorbent assay for Antigen Detection.                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Intra-assay Precision (Precision within an assay) | 3 samples with low, middle and high level Relaxin (RLN) were tested 20 times on one plate, respectively.                                                                                                                                                                                                                                                                                                                                                                                   |
| Inter-assay Precision (Precision between assays)  | 3 samples with low, middle and high level Relaxin (RLN) were tested on 3 different plates, 8 replicates in each plate.                                                                                                                                                                                                                                                                                                                                                                     |
| CV(%) =                                           | SD/meanX100                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for RLN elisa kit | This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Relaxin (RLN) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Relaxin (RLN) and unlabeled Relaxin (RLN) (Standards or samples) with the pre-coated antibody specific to Relaxin (RLN). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Relaxin (RLN) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Relaxin (RLN) in the sample. |
| Product Categories/Family for RLN elisa kit   | Endocrinology; Reproductive science; Hormone metabolism                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
