

## Human Caspase 5 (CASP5) ELISA Kit | CASP5 elisa kit

Human Caspase 5 (CASP5) ELISA Kit

CATALOG #  
AAA139946

REACTIVITY  
Human

### PRODUCT SYNONYMS

Caspase 5 (CASP5); Human Caspase 5 (CASP5) ELISA Kit; ICE(rel)III; CysteinyI Aspartate Specific Proteinases 5; Apoptosis-Related Cysteine Peptidase; Protease ICH-3; Protease TY; CASP5 elisa kit

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Reactivity                                        | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Caspase 5 (CASP5). No significant cross-reactivity or interference between Caspase 5 (CASP5) and analogues was observed.                                                                                                                                                                                                                                                                                        |
| Sequence Length                                   | 290                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for CASP5 elisa kit | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Caspase 5 (CASP5). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Caspase 5 (CASP5). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Caspase 5 (CASP5), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Caspase 5 (CASP5) in the samples is then determined by comparing the O.D. of the samples to the standard curve. |
| Product Categories/Family for CASP5 elisa kit   | Signal transduction; Apoptosis; Tumor immunity; Infection immunity                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

NCBI AND UNIPROT INFORMATION

|                         |              |
|-------------------------|--------------|
| NCBI GI #               | 498923335    |
| Molecular Weight        | 33,252 Da    |
| NCBI Official Full Name | caspase 5    |
| UniProt Protein Name    | Caspase 5    |
| UniProt Entry Name      | R4PJF7_LITVA |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
